PRAVEEN KUMAR

ENGINEERING INFRASTRUCTURE MANAGER

Engineering Infrastructure Manager with 7+ years of experience spanning AWS cloud architecture, CI/CD, Kubernetes, Docker, and Infrastructure as Code. Currently leading infrastructure strategy and DevOps teams across multiple product lines. Strong hands-on expertise in Terraform/Terragrunt, GitLab CI/CD, Jenkins, and Linux administration (RHCSA). Skilled in monitoring/observability using CloudWatch, Prometheus, Grafana, Loki, Zabbix, and Nagios. Proven ability to automate deployments and manage cross-functional teams to improve reliability, speed, and stability across Dev/QA/Prod environments.

WORK EXPERIENCE

DevKraft Technologies

03/2026 - Present

Technology Services Company

Engineering Infrastructure Manager

- Leading infrastructure strategy and DevOps operations across multiple client projects including WhiteSwan Securities, GoodMeeting, and Dekoder Voice AI.
- Managing and mentoring a team of engineers, driving best practices in cloud infrastructure, CI/CD, and platform reliability.
- Architecting scalable cloud-native infrastructure and deployment pipelines for diverse product lines spanning fintech, collaboration, and AI domains.
- Establishing standardized DevOps workflows, IaC practices, and observability frameworks across all projects to ensure consistency and operational excellence.

Exclusive Markets Ltd

02/2024 - 06/2025

Financial Services and Trading Solutions · Remote

DevOps Engineer

- Led end-to-end DevOps operations and AWS cloud strategy across Dev/QA/Prod, maintaining 99.9%+ availability.
- Standardized Infrastructure as Code using Terraform + Terragrunt, reducing environment provisioning from 2-3 days to under 20

minutes.

- Designed and maintained GitLab CI/CD pipelines for containerized applications, improving deployment speed and reducing release failures.
- Built scalable container platform using Docker + Kubernetes (EKS) with autoscaling and safer rollouts.
- Implemented observability using CloudWatch, Prometheus, Grafana, and Loki to reduce MTTR.
- Drove AWS cost optimization (right-sizing, lifecycle policies, automation), reducing monthly spend by 20-25%.
- Owned production reliability (incident response, RCA/post-mortems) and mentored team on IaC/Kubernetes best practices.

KEY AUTOMATIONS

- Automated S3 Glacier log restore + auto-download using Bash + AWS CLI, reducing manual log retrieval time during audits/incidents.
- Implemented branch-based GitLab CI/CD rules with Docker builds and availability validation.
- Migrated application servers from Netmagic to AWS with zero downtime.

One Mobikwik Systems Pvt. Ltd.

04/2022 - 09/2023

Indian Financial Technology · Digital Payments

DevOps Engineer

- Built deployment jobs and automated operational tasks using Bash scripting, reducing manual effort and human error.
- Implemented monitoring and alerting using Zabbix, enabling proactive detection and faster response times.
- Set up centralized log shipping and retention using Amazon S3 + Loki, improving debugging efficiency and audit-ready storage.
- Collaborated with development teams to support releases, troubleshoot production issues, and improve deployment confidence.

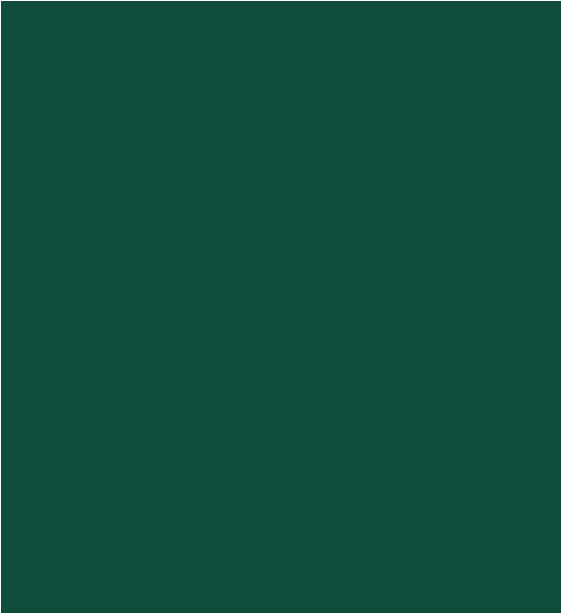

Capgemini India Pvt. Ltd.

08/2021 - 03/2022

Consulting, Technology Services & Digital Transformation

DevOps Engineer

- Provisioned and managed AWS infrastructure: EC2, ALB/ELB, Route53, RDS, S3, CloudFront, EBS for enterprise workloads.
- Performed daily health checks and troubleshooting for Linux servers (Apache, MySQL), improving uptime.
- Implemented monitoring using Nagios for service availability and faster fault detection.

Hindustan Times

07/2019 - 06/2021

Media Organization · High-Traffic Publishing

DevOps Engineer

- Designed and maintained highly available infrastructure supporting 24x7 uptime and high-traffic media workloads.
- Supported continuous delivery pipeline, improving deployment cadence from weekly to daily releases.
- Coordinated with engineering/ops teams to streamline releases and reduce deployment risk.
- Proactively monitored infrastructure health during traffic spikes and critical publishing windows.
